A Math Problem: A Day With The Lord

2 Peter 3:3 tells us, a day with God is equal to 1,000 of our years. With that thought in mind, I ran some math to see how many of our years equal minutes and hours to God.

525,600,000 minutes in one thousand years / 1,440 min one day

*(Above number by: 1440 minutes in day * 365 days * 1000 years)*

=

365,000 of man's minutes equal 1 of God's minutes

365,000 man's minutes / 1440 minutes in a day

=

253.47 man's days (= to 1 of God's minutes)

253.47 man's days * 15 God's minutes

=

3,802 man days (= to 15 of God's minutes)

3,802 man days / 365 days in year

=

10.41 man's years (= to 15 of God's minutes)

10.41 man's years * 8

*(Above number by: 8 * 15 God's minutes = 120 God's minutes = 2 God's hours)*

=

83.33 man's years = 2 God's hours
